Land and soil resources	Very High
Surface water resources	Very High

Public comment submission: Wyndham Landfill application for works approval

PAGE 3: Issue details

**Q9: Issue 1 (Optional)**

It appears that the proposal is revenue based and doesn't reflect nearby residents, with little supportive information about the possible health effects to local elderly residents, why?

**Q10: Issue 2 (Optional)**

There is no mention of the residential zoning east of the site where I live, it mentions farming land only next to landfill in the works application, it should be considered?

**Q11: Issue 3 (Optional)**

It mentions gas generation, How will it be managed with current operators, they have had a lot of problems in the past, a management change is required why because they have no idea.

**Q12: Issue 4 (Optional)**

No mention about health or health monitoring why hasn't it been considered ?

**Q13: Issue 5 (Optional)**

Air born rubbish will increase, it is bad now and on windy days will increase dust and rubbish near my house, transfer station should be enclosed. additional rubbish collectors will be required to collect this rubbish that is blown around why is explained in these words

PAGE 4: Endorsement and submission

**Q14: Do you object or approve the proposal?**

Object,

Please provide an explanation

See my explanations earlier No management of air born rubbish Health effects of residents not taken into consideration Possibility of future gas generation and lack of management not considered Residential Zoning not considered Current operator can not manage this facility due to past problems No health monitoring being considered for local residents

**Q15: Additional materials (Optional)**
