Sustainability	Very High
Other	Very High

Other (please specify)  
The effects to elder residents in the general area with health issues.

Public comment submission: Wyndham Landfill application for works approval

**Q8: Potential impacts**

Ground water resources	Very High
Noise amenity	Very High
Health risks and/or hazards	Very High
Air (e.g. emissions, dust or odour)	Very High
Land and soil resources	Very High
Surface water resources	Very High
Other	Very High
Other (please specify)	Residential values

PAGE 3: Issue details

**Q9: Issue 1 (Optional)**

There is no mention of the residential zoning east of the site, it only mentions farming land in the immediate east, and no mention of residential developments in the works application

**Q10: Issue 2 (Optional)**

No mention about health or health monitoring

**Q11: Issue 3 (Optional)**

Only minimal mention about air born rubbish, during normal business on windy days additional dust and air born rubbish is generated the as the transfer dump pits are open to the environment the increase in waste facility will generate more air born rubbish which will be blown over the area. Rubbish collectors will be required to collect this rubbish or have closed in collection facility built

**Q12: Issue 4 (Optional)**

It seems that its all about revenue, there are a lot of words in the application, but little to no supportive information about the possible health effects to local elderly residents

**Q13: Issue 5 (Optional)**

There is mention about gas generation and little to no management of released gas or prevention of possible fires from gas release, and with the current knowledge of the site management and historically noted poor performance they have no way to manage this facility professionally, A site management change is required with expertise in this area.

PAGE 4: Endorsement and submission

Public comment submission: Wyndham Landfill application for works approval

**Q14: Do you object or approve the proposal?**

Approve subject to conditions,

Please provide an explanation  
Zoning has left out local residents No health  
monitoring taken into consideration No management  
of air born rubbish Health effects of residents not  
taken into consideration Gas generation and possible  
fire management Current operator can not manage  
this facility if it goes ahead, a management change is  
required. See my explanations early in my submission

**Q15: Additional materials (Optional)**

*Respondent skipped this  
question*
