**Subject:** Boral/North Shore - issues to be addressed

Hi Adam,

Thanks for coming to the meeting last week. I have since spoken to a number of the attendees and other concerned residents. We'd like to lodge a number of issues on behalf of the [REDACTED]

1. Significant increase in heavy vehicle traffic volumes in the North Shore area not adequately addressed/misrepresented in the documentation provided by Boral eg. a fourfold increase as opposed to a neutral number suggested (plus increasing by 30% on plans), especially during peak times.
2. Noise not being addressed accurately eg. baselines being nominated as neutral versus the actual measured values, and conveyor systems not included in estimates even though they would be high contributors to noise, seemingly just because they are on port land, continuously 24/7.

I am available to elaborate more by email or phone when able - thanks, much appreciated.

Regards,

[REDACTED]
